Introducing our 2023 **Team Blazer** Pro Family! After a wildly successful 2022 season, we're bringing unprecedented momentum into 2023. Three current/former world record holders, many big wins and a few new faces make this our strongest and most versatile lineup ever. As a family-owned business, Blazer hand-selects our pros for their performances on AND off the water. They are not just our Pro Staff, they become part of the family. Follow Blazer Boats on social media to track these gentlemen on their missions to dominate 2023.

Blazer Heritage

Blazer stepped into the market in 1978 with powerboats that instantly outperformed competitors. Keith and Lonnie Craft began with a small line of boats, and grew the business to become a strong factor in the high performance Bass and Bay boat markets. Blazer Boats are designed and hand-crafted for tournament fishermen by tournament fishermen, and we continue to strive to build the highest quality boats in today's market.

100% Composite Hull

Blazer has developed industry leading techniques and procedures that assure the highest quality, strongest and most durable boats on the market. Our molds are meticulously maintained, inspected and re-inspected for uniformity before each boat is built to insure years of trouble-free service. After the mold has been prepped, the building process begins with the applying of the gel coat. The first layer of fiberglass is then applied.

Alternating layers of matte and woven glass are sandwiched to make the strongest possible hull. Each layer is hand-laminated as it is applied for the most uniformity and strength possible. A stringer grid is then built from foam-cored fiberboard and installed in the hull where it is completely encapsulated in fiberglass. The transom is constructed of layers of composite that are bonded together to handle the most powerful of today's outboards.

Outboard Power

Power your Blazer with top-of-the line engines.

MERCURY **SUZUKI** **YAMAHA**

EXPERIENCE THE BLAZER THAT PROFESSIONALS USE
It's longer and wider while still maintaining the performance you have come to expect from a Blazer.

The 650 Pro Tour is packed with features tournament anglers need to be their best at every level, from the weekend angler up to the highest level of professional bass fishing.
